SERVICE INFORMATION LETTER

OXYGEN (ATA SYSTEM 35)

TO: ALL OPERATORS UTILIZING SCOTT AVIATION PROTECTIVE BREATHING EQUIPMENT (PBE) P/N 802300-14

SUBJECT: AVAILABILITY OF AN INFORMATION LABEL INTENDED TO PREVENT INADVERTENT MIS-INSTALLATION OF OPTIONAL CONTAINER ASSEMBLY P/N 803436-02, FOR THE SCOTT AVIATION PBE.

The Scott PBE P/N 802300-14 may be approved for use on many different aircraft because it is approved by the United States Federal Aviation Administration (FAA) under Technical Standard Orders TSO C99 and TSO C116. In some instances, an optional Container Assembly P/N 803436-02 may be used to hold the PBE. See Figure 1.

This Service Information Letter is to remind aircraft operators that optional Container Assembly P/N 803436-02 **IS NOT** an independent stowage compartment, and to make available an Information Label for the Container Assembly to prevent it from inadvertently being mis-installed.

Container Assembly P/N 803436-02 is intended to be mounted as a divider inside a closeable stowage compartment meeting the requirements of FAA regulation 14 CFR paragraph 25.787.

If it is required to place a Scott PBE in a passenger or crew compartment or a galley, use Scott Stowage Compartment Assembly P/N 803436-22. When properly approved for installation in a specific aircraft or aircraft type, the Scott stowage compartment is capable of meeting the requirements of FAA 14 CFR paragraph 25.787. See Figure 2.

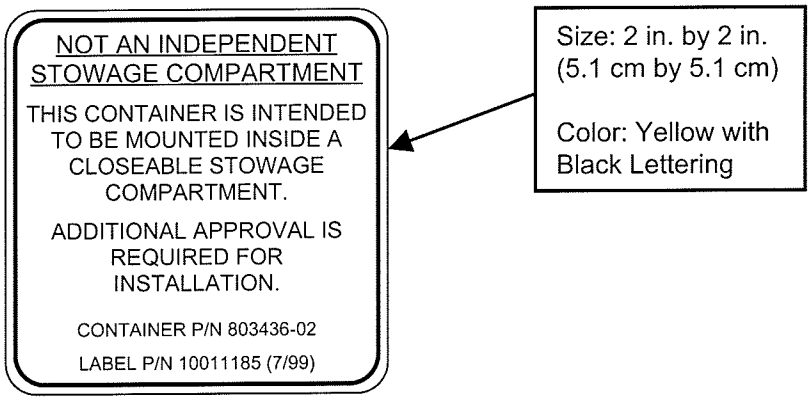
SERVICE INFORMATION LETTER

To prevent the inadvertent installation of Container Assembly P/N 803436-02 in a location where Stowage Compartment Assembly P/N 803436-22 should be approved for use, Scott is making available Information Label P/N 10011185. Information Label P/N 10011185 is to be applied to the exterior of all Container Assemblies P/N 803436-02, both those installed in aircraft and those in storage for future use. See Figure 3.

Information Label P/N 10011185 is available free of charge from Scott Aviation for use on Container Assembly P/N 803436-02. Only the Information Label obtained from Scott Aviation is to be used. No reproduction Label may be used. See below for how to contact Scott Aviation to obtain Information Labels.



Information Label P/N 10011185
Figure 3

If it is determined that a Container Assembly P/N 803436-02 has been inadvertently installed in a location that requires a stowage compartment meeting the requirements of FAA 14 CFR paragraph 25.787, it is recommended that first the PBE be removed from the Container Assembly. Then the Container Assembly must be removed from its present location, and approval obtained from the cognizant authority for reinstallation of the Container Assembly inside a closeable stowage compartment. If this is not possible, then contact Scott Aviation as shown below to arrange for the remanufacture of the Container Assembly P/N 803436-02 into a Stowage Compartment Assembly P/N 803436-22, or for the purchase of a new Stowage Compartment Assembly P/N 803436-22 for the original location. Note that it is the responsibility of the installer to obtain the necessary approvals for installation in an aircraft.

TO CONTACT SCOTT AVIATION FOR INFORMATION LABEL P/N 10011185

Request Information Labels by fax at 1-716-681-1089 (attention: Product Support Department) or by e-mail at avprodsupt@scottaviation.com. Provide quantity of Information Labels required, your name, airline name & address, and your telephone & fax numbers. The Information Labels are free of charge.

TO CONTACT SCOTT AVIATION FOR REMANUFACTURE OF CONTAINER ASSEMBLY P/N 803436-02

To obtain authorization to return your Container Assemblies to Scott for re-manufacture send a fax letter to 1-716-681-1089 (attention: Service Dept.) or send an e-mail message to avservice@scottaviation.com. Provide quantity of Container Assemblies, your name, airline name & address, and your telephone & fax numbers.
